CV - Dr. The Chapin - psych health.

- I gave him info. and agency names about her flat affect in interviews

- he said she could be depressed
recommended a psychiatric
assessment to assess for possible
mood disorder or thought disorder

- he said she is an adult + would
need to have referral from her
family Dr. to a psychiatrist.

- he also said could possibly look at
parent capacity - however psychiatrist
refused by family Dr. not likely
to treat

- he said could start off w/
open health health query in psyc.
