OV - Dr. Altman

- he met with both Steve +
Samantha + the baby

- after hearing an account about
possible depression (Samantha)
+ flat affect - he did a
consult + long assess.

- his report is that Samantha
does not present with
a diagnosis of depression - he
does see her as a "closed
book" - she presents as
not ~~open~~ wishing to
tell all of the info. - this
may be due to her own
style of intimacy and/or
some of her own life
experiences.

- his impression is that they are
both committed to each
other and to parenting

- Samantha said she did not
want to be pregnant + was
dare what feel about it
but her sense decided that
this is her child + she

OU - Dr A - cont.

being pregnant + how she met
 see a Dr. b/c concerned
 about Dr. Farby per Inapp.
 repeatedly - she denied
 having had a bad exp. but
 got comments from TV.

→ Dr. A. suspects there may be
 some past abuse in her
 life but none confirmed.

→ he had a ~~good~~ sense they
 have a decent relationship
 and that again the flat
 affect we observed is likely
 due to her method
 + style of communication - not
 depression or feelings of sadness.

- She is not less sad about being a
 child - as she felt
 when she was pregnant.
