Child Welfare History:

Both parents have been involved with child welfare agencies as permanent wards. Samantha became a ward of Cree Nation Child and Family Services in 1993 and Steven a ward of Winnipeg Child and Family Services in 1991. Samantha had one child, [REDACTED] when she was seventeen years old who is a permanent ward in care of Cree Nation Child and Family Services. Steven and Samantha had two children together. Phoenix born on April 23, 2000 and apprehended at birth as neither parent was ready or prepared to parent their daughter. In September of 2000 Phoenix was returned to her parents. On April 29, 2001, they had another baby named [REDACTED] who went to live with them and Phoenix. [REDACTED] died of natural causes related to complications of pneumonia on July 15, 2001 while in the care of Steven shortly after Samantha and Steven separated. Phoenix remained with Steven and the file was closed in March 2002 because Steven did not want any further services from the agency. The file was re-opened on February 28, 2003 due to medical concerns about Phoenix having a foreign object in her nose and was infected. The file was subsequently transferred for ongoing service on June 27, 2003, after Phoenix was apprehended on June 23, 2003. Steven's ability to parent his daughter had deteriorated to the point of him being under the influence most of the time and subjecting his daughter to inappropriate caregivers.

Identified Problems:

1. Steven's ability to parent deteriorated to the point of him being under the influence of alcohol and drugs most of the time and subjecting his daughter to inappropriate caregivers on a regular basis.
2. Steven's mistrust and reluctance to work with the agency.

Interventions:

Numerous attempts to contact Steven after Phoenix was apprehended were unsuccessful in connecting with him. Once the file was transferred contact was made with Steven, the ADP papers completed and arrangements for Phoenix to be placed in a Place of Safety were made. When the matter went to court Ms. Kematch consented to a three month Temporary Order on July 3, 2003 and Mr. Sinclair consented on August 2, 2003. During the time Phoenix was in care access arrangements were open to both parents who visited her on a regular basis.

Relevant Reports:

Intake Transfer Summary by Marnie Saunderson dated April 28, 2000
 Continued Summary of Service and Intervention by Andy Orobko dated May 1, 2000
 Child In Care Closing Summary by Kerri-Lynn Greely dated October 2, 2000
 Intake Opening Transfer Summary by Laura Forrest dated June 27, 2003

Unresolved Problems:

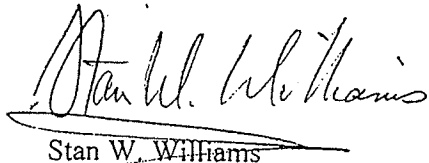

Mr. Sinclair requested his child stay in care until he felt strong enough to care for her once again. He has had his time out and will parent Phoenix starting October 2, 2003. He has done no programming and as such is prone to returning to an unhealthy way of managing stresses in his life. He is aware of the need to arrange for appropriate alternative caregivers when he feels the need for a break or time out for respite.

Recommendations for Future:

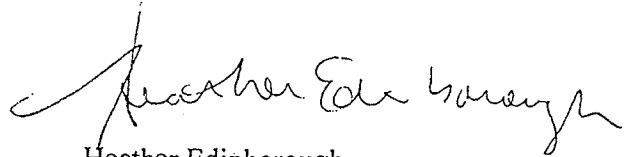

In the event Mr. Sinclair returns to unhealthy ways of managing his life and caring for his daughter, it is recommended Phoenix be placed with Place of Safety Foster Parents, Rohan and Kimberly Stephenson. It is also recommended he attend to programming for lifestyle difficulties prior to him considering parenting his daughter Phoenix. It is anticipated a Temporary Order of six months to a year would be required.

Reason for Closing:

The three month Temporary Order Mr. Sinclair and Ms. Kematch consented to expired on October 2, 2003. Phoenix has been returned to live with her Dad and is no longer in care. Mr. Sinclair's file will close today as there are no outstanding child protection issues.
