Dear Mr. Schellenberg:

Re: Phoenix Sinclair (DOB: April 23, 2000; DOD: March 23, 2006)

We have received a report from the Chief Medical Examiner (CME) with respect to the death of the above-named. We are including a copy of this confidential report for your information. Given the sensitive nature of the report, we ask that you not make copies of the report nor share its contents without the written permission of the Executive Director of the Child Protection Branch. However, a copy of the CME's report may be shared with staff of the Winnipeg, Rural and Northern Child and Family Services (Winnipeg regional office) (WCFS) who are directly involved with the matter for purposes of reviewing the recommendations in the CME's report.

The CME has reviewed the services provided to this child's family. As a result of the investigation, the CME has made six recommendations, three of which involve the General Authority and WCFS. They are as follows:

Recommendation 2: The CME recommends that the General Authority ensure that the program standards for investigation of allegations of mistreatment of children are followed by agencies under its jurisdiction, specifically the requirement to ensure that the children involved are safe be fulfilled by ensuring that a child about whom a report of suspected abuse or neglect is made is seen by the investigating worker(s).

Recommendation 5: The CME recommends that the General Authority in conjunction with WCFS ensure that full names are obtained for persons associated with protection cases upon (WCFS) becoming aware of the involvement of a new individual in a case. The CME further recommends that criminal risk assessments of new family members or associates be requested in cases involving families with a history of child protection concerns.
